VITS ALPR™

The real solution to Automatic License Plate Recognition

♣ **The VITS ALPR technology is integrated with VITS 400 system.**

The VITS ALPR license plate recognition technology meets and exceeds our customer specified requirements. It is fast, highly accurate and cost effective leading edge technology that has given a new dimension to ALPR systems.

◆ It is an innovative character recognition and identification technology for traffic surveillance and many other applications where accuracy, speed and automation are desired objectives. Handles **multiple languages** and LP variations!

♥ **Applications for the VITS ALPR are:**

Guard shack - Entry and Exit monitoring system

Flexible and automatic **highway toll collection** systems

Analysis of city traffic during peak periods

Automation of **weigh-in-motion** systems

Enhanced **vehicle theft prevention**

Effective **law enforcement**

Increase efficiency of **border control systems**

A power tool for automated and monitored **access control systems**

Prevention of non-payment at gas stations, drive-in restaurants, etc.

Automation and simplicity of **airport and sea-port logistics**

Data mining tools and customized reports may be provided to determine traffic patterns, alerts and security warnings, based on license plate database

♠ **Enhance Security**

Day / Night / All Weather operation

User friendly interface

Customizable database and reporting options

♠ ♠ ♠ ♠ **VITS ALPR™ continues to meet and exceed customer expectations!**
