## INTRODUCING Affordable, Resin Moldings with Changeable Inserts

Homes have always been enhanced using expensive, ornate moldings. Now, the stately elegance of distinguished moldings is easy and affordable.

M-Boss Inc. high-density moldings are lightweight and customizable to individual tastes by mixing, matching molding styles and then combining the moldings with pressed metal inserts that can be changed over time. Metal inserts are available in a wide selection of patterns, sizes, and finishes.

Resin moldings have all the aesthetic appeal, density and workability of wood with none of the hassles:

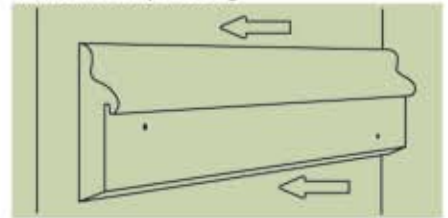

- **Cuts like wood**
- **Will not crack, split or rot**
- **No knots or imperfections**
- **Can be painted or stained without sanding**

Perfect for any home, office or business.

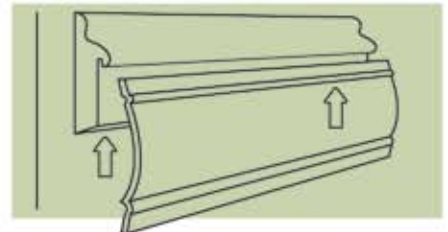

Add M-Boss Inc. ceiling medallions or even a coffered ceiling that matches the molding to complete the room.

### Installation is as easy as 1-2-3

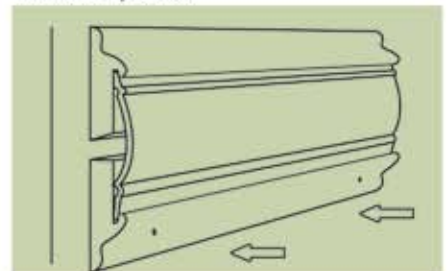

1. Install the top molding

2. Slip the metal insert into place.

3. Install the bottom molding, locking the metal insert into position.

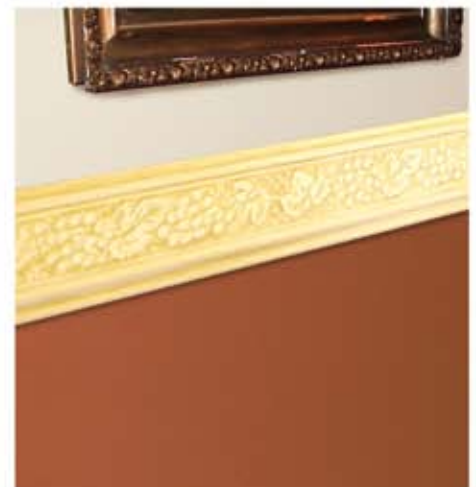

Change the insert by removing the bottom molding; replacing the metal insert; and re-installing the bottom molding.

Use as a custom trim...

as a decorative cornice...

or as an elegant molding.
