

Regal[®] Flushometer

SLOAN[®]

Back to Bas Compromis

The **Sloan Regal**[®] Flushometer incorporates standards for Flushometer design, quality and performance that should be expected and required from any Flushometer installed in a typical commercial, institutional or industrial washroom. The components of the Regal valve reflect the proud design heritage of the Sloan family of Flushometers.

The Sloan REGAL is the result of an extensive testing program designed to manufacture a quality Flushometer at a competitive price. In addition, the Sloan name on a Flushometer is your guarantee of trouble-free performance over an extended service life.

Basics without Compromising Quality

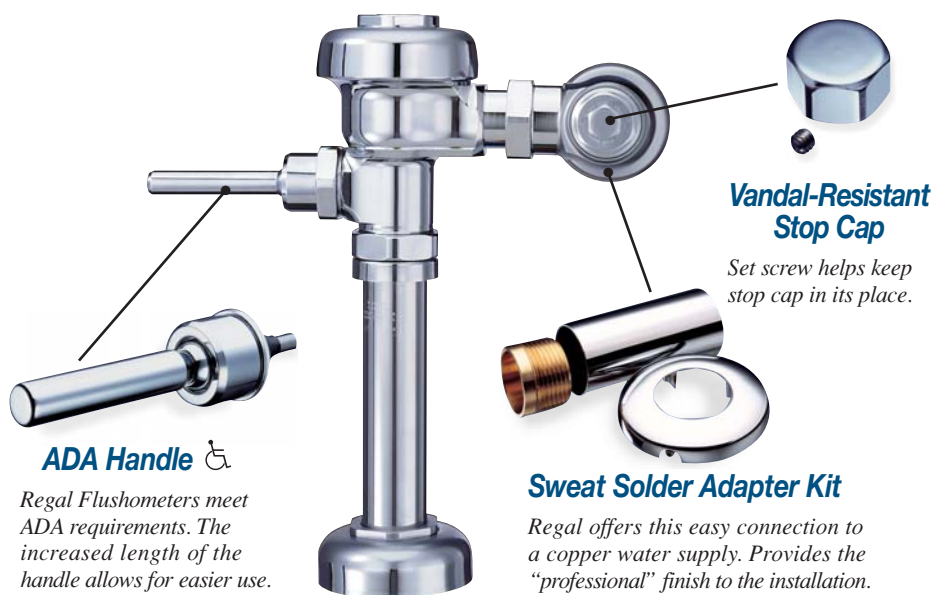

The Regal® Flushometer incorporates those “**Back to Basic**” features that you have associated with Sloan Flushometers:

- Accurate, non-adjustable flush delivery
- High copper, low zinc semi-red cast brass alloy
- Oscillating, Non-Hold Open Handle
- Bak-Chek® Control Stop with vandal-resistant cap
- Easy Repair and Maintenance
- Guaranteed Performance - 3 Year limited warranty
- Made in USA

Best of all, Regal Flushometers are available at costs competitive with foreign sourced ‘copycat’ valves. Do your open spec clients/customers a favor and offer them a Regal Flushometer. It is their assurance of dependable Sloan performance and quality.

Upgrade to the Regal® XL

You can upgrade
your Regal to a
Regal XL Flushometer.
This includes:
