

PRISON
FLUSHOMETERS

SLOAN®

COUNT ON SLOAN FLUSHOMETERS TO DO THE JOB

Reliability and Control—the Hallmarks of Sloan Engineering.

Perhaps more than any type of plumbing application, penal installations require absolute reliability and control. Plumbing products designed for use in correctional facilities must withstand daily abuse. With today's growing prison population and shrinking support staffing, long life and low maintenance in a plumbing product is required and demanded.

That's why Sloan Royal Prison Flushometers are specified and used in more prisons and jails than any other brand.

Sloan Prison Flushometers are built tough. Sloan Flushometers provide the performance and water conservation required with today's new generation of Low Consumption water saving fixtures. Sloan Prison Flushometers are available with traditional, mechanical push-buttons or hydraulic operators to meet ADA accessibility requirements. Valves can also be supplied with solenoid operators for use with Sloan's Programmed Water Technologies MICROPlumb™ Control Systems.

ROYAL PRISON FLUSHOMETERS

- Non-Adjustable and non-hold open to ensure water conservation
- Simplicity of design for easy maintenance
- Patented Diaphragm Kits and High Back Pressure Vacuum Breaker for use with new style Low Consumption fixtures
- Machined from high copper, low zinc castings
- Made in USA

MODELS FOR:

CONTROL**

Programmed Water Technologies offers you a line of technically advanced electronic controls called MICROPlumb™ Programmed Control Systems. These programmable controller/ input devices use programmed software instructions to operate ON/OFF/DELAY/LOCK-OUT commands with plumbing fixtures. It helps YOU control your entire plumbing network, making it ideal for high use/abuse situations. MICROPlumb systems are highly adaptable to a variety of custom requirements in prison design and prison management.

Sloan Can Be Your Total Provider Of Prison Control Systems. With the reliability, low maintenance, and accuracy of Sloan Royal Prison Flushometers, and the precise control offered by Programmed Water Technologies, Sloan can help you maintain control of your facility. Our products are built to withstand abuse, are long-lasting and meet ADA requirements.

MICROPlumb CONTROL SYSTEMS

Maximize your control over the use and abuse of plumbing fixtures in the most demanding environments

PROGRAMMED OPTIONS INCLUDE

- fixture run-time
- activation time delays
- regulation of simultaneous fixture use
- fixture lock-out control (limited activation)

MICROPlumb™ CONTROL SYSTEMS CAN BE USED TO CONTROL:

- *Flushometers/Lavatories/Showers*

MICROPlumb™ CONTROL SYSTEMS

- *Are ideal for both new construction and retrofit*
- *Can integrate with other manufacturers' anti-flood devices*
- *Save water*
- *Reduce maintenance*

**SLOAN —
THE WORLD
LEADER IN
ELECTRONIC
PLUMBING
SYSTEMS**

There can be only one company that is the leader in its market. In Plumbing Systems, that leader is Sloan Valve Company.

A FAMILY OF RELIABLE PRODUCTS

Sloan manufactures and sells more Flushometers to world markets than all other brands combined. Our innovative designs, high quality, dependable operation and long life have become the benchmark of the industry.

WORLD-CLASS PERFORMANCE

Sloan Products, with their world-class quality and reliable operation, can be found in correctional facilities throughout the world, serving a variety of building requirements.

SLOAN PROVIDES EXCELLENCE

Our focus has been to deliver products that perform in a consistent, reliable way. Since our beginnings in 1906, we have delivered *Quality* to the plumbing industry. That's why today, more than any other manufacturer, the name Sloan has come to stand for Quality, Dependability and Reliability of engineered products.
