

SLOAN FLUSHOMETER™

SLOAN FLUSHOMETER™

BUILT TO LAST

The most durable Flushometers available are manufactured by Sloan Valve Company. Now, you have even more choices with the introduction of the Sloan® Flushometer.

- Solid construction from the highest quality materials
- Quick installations with products you know and trust
- Meets current consumption and accessibility standards

Fixed Metering By-pass

Sloan's design is fixed for consistent performance every time. Instead of an expanding and contracting By-pass design that is counter to the operating principles of proportional, metered flushing, Sloan Flushometers deliver an exact amount of water each time, regardless of water pressure or operating conditions.

Sloan's Linear Filtered By-pass with Vortex Cleansing Action is standard on the Sloan Flushometer.

Permex® Diaphragm

Sloan's exclusive Permex® synthetic rubber protects the Sloan Flushometer's performance from aggressive chemicals (chloramines) found in today's water supplies. The specially designed material Sloan uses to construct its diaphragms ensures long life even in the harshest conditions. That's because Permex adapts to changing conditions while competitive materials become "locked" into a single pattern. But when water quality or pressure changes, the integrity of these other valves is compromised, rendering them unable to deliver consistent performance over the long run.

Protected By-pass

Sloan Flushometers help keep foreign particles from clogging the By-pass and hindering performance.

Job Pack Packaging

Sloan's Flushometers are packaged for today's fast-track applications. Sent directly to the worksite upon request, contractors and distributors can shorten delivery and installation times, as well as automatically qualify for Value Alliance Points. For example, when you ship directly to the work site, Sloan will automatically credit your accounts with Value Alliance Points based on invoices from Sloan, saving you the time required to FAX invoices. (see www.valueallianceclub.com for more information)

Variations Available

(use the following as a suffix to designate an option you want)

- DFB = add Permex® Dual Filtered Fixed By-pass Diaphragm
- JP = Manual Job Pack (set of six Flushometers), available on drop shipments and jobs tagged at the plumbing distributor*

*In these variations, the name of the job and name of the contractor must be shown. This ensures issuing Value Alliance Points automatically to both contractors and distributors.

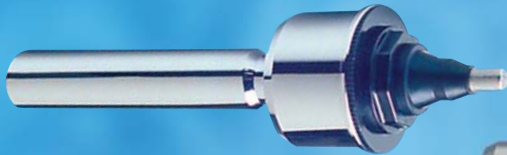

SLOAN FLUSHOMETER™

The Sloan® Flushometer is available with the Permex® diaphragm, CID refill head as standard. You can elect to use the standard, Linear Filtered By-pass with Vortex cleansing action, or the optional chloramine resistant Dual Filtered Fixed By-pass.

■ Cast Wall Flange with Set Screw

■ ADA-Compliant Handle

■ Sloan Vacuum Breaker

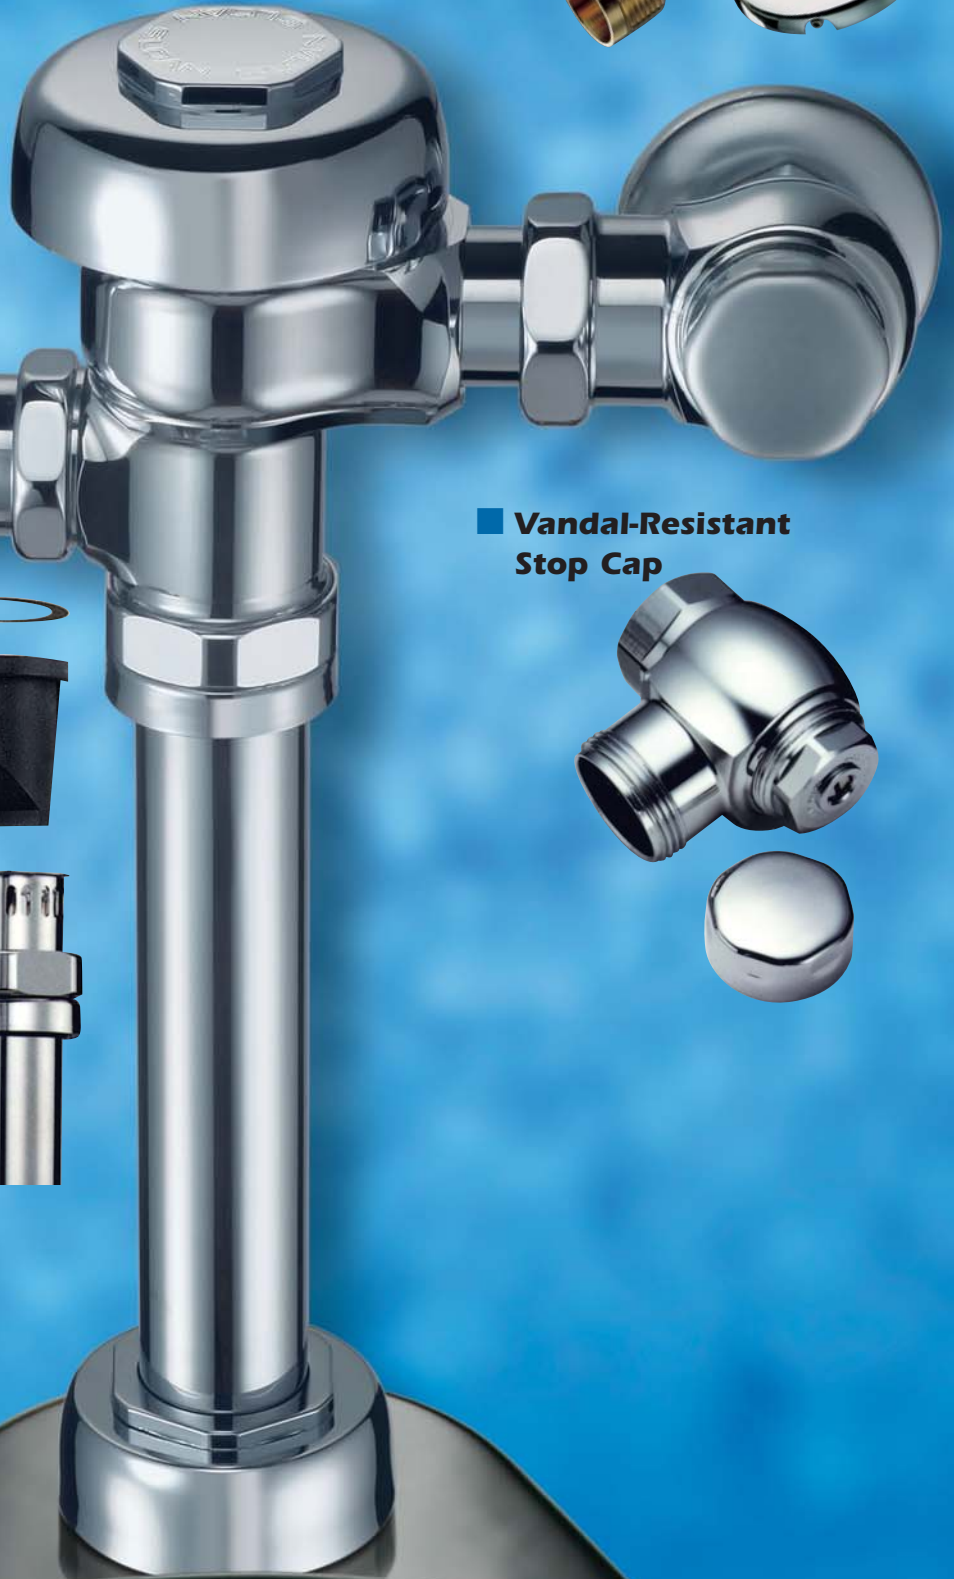

■ Vandal-Resistant Stop Cap

Optional Variation

Sloan's Dual Filtered Fixed By-pass is optional on the Sloan Flushometer. The Dual Filtered Fixed By-pass is the best performing diaphragm in the world.

From the World Leader in Flushometers

There can only be one company that is the leader in its market. In Plumbing Systems, that leader is Sloan Valve Company.

A Family of Reliable Products

Sloan manufactures and sells more Flushometers for restrooms to world markets than all other brands combined.

World-Class Performance

Royal Flushometers, with their world-class quality and reliable operation, can be found in cities throughout the world.

Sloan Provides Excellence

Sloan's focus is to deliver products that perform in a consistent, reliable way. Today, more than any other manufacturer, the name Sloan has come to stand for Quality, Dependability and Reliability of engineered plumbing systems.

Service

From our worldwide distribution network, Sloan products are available when you need them. Sloan's Installation Engineering Department is on call at 800-745-0800 or contact your local Sloan Sales Representative.
