

*The future of vision & daylight control*

# VU LITE™

PREMIUM-QUALITY BLINDS BETWEEN GLASS

ViuLite is a system of blinds that are permanently sealed within a double-glazed cavity for a completely dust-free and maintenance-free environment. ViuLite ensures total protection against dirt, germs and weather conditions. ViuLite Venetian blinds are produced with aluminum slats featuring a choice of colors and slat widths of 1/2" (12.5mm) and 5/8" (16mm). The versatility of both product choice and control mechanisms makes ViuLite suitable for all types of framing systems.

ViuLite provides protection from solar radiation and can quickly regulate the internal environmental lighting levels. It filters light transmission and controls the effects of daylight with a simple tilting of the blinds. Heat and visual comfort are easily adjusted to accommodate the changing seasonal conditions.

### ViuLite blinds can be controlled by a variety of mechanisms including:

### Key advantages of the ViuLite integrated blind system include:

- Permanently sealed blinds for a dust-free, hygienic environment
- Blinds can tilt and raise (tilt-only also available)
- No cleaning or maintenance required
- Protected from damage unlike exterior blinded systems
- Enhanced solar shading features
- Variable control of vision (the blinds can be angled such that vision is permitted from one area to another, but limited in the opposite direction)
- Blinds are available in a choice of two standard colors
- Airspace can be as narrow as 3/4" (20mm) to fit into tighter glass pocket depths
- The system can be readily installed in exterior applications
- Supported by Unice's 45 year record of exemplary customer service

Unicel is a licensed manufacturer of Pellini ScreenLine® integrated blinds in North America, and exclusive distributor in Canada. The new ViuLite product combines Unicel's specialty glazing expertise with Pellini's market and technology leadership for integrated blinds.

### About Unicel Architectural

For over 45 years, Unicel Architectural has built a reputation for the most advanced aluminum and glass solutions. These solutions encompass louvered glazing, skylights and more, to enhance major global construction initiatives with the utmost quality and reliability. With its proprietary technology, Unicel's Vision Control® delivers unprecedented comfort and control over vision, light, temperature and sound with a patented combination of louvers between glass that are hermetically sealed and cordless. Unicel's solutions are guaranteed for longevity, optimized for energy efficiencies, and customizable to any design, environmental or cultural requirements. Unicel combines its market leading know-how with great design to ensure optimal aesthetics and sustainable performance.
