MADE IN THE USA

ACCU-FIT

Accu-Fit Fall Protection Railings from Safety Rail Company are the perfect solution for combining form and function with distinctive styling that compliments building architecture.

When building aesthetics are as important as addressing fall protection needs, the Accu-Fit Railing System offers many enhanced solutions. Accu-Fit Railings offer clean sight lines, upscale styling, non-penetrating design and are assembled right on-site to ensure an accurate fit that maintains a uniform appearance throughout the installation. All this while being fully OSHA compliant.

Review some of the options available and see why the Accu-Fit Railing System just may be the perfect answer you've been looking for.

ACCU-FIT TRADITIONAL SERIES

Our Accu-Fit Traditional Series railing system features vertical stanchions that evoke both strength and style. Vertical and horizontal contours of the railing deliver crisp contours that accentuate and compliment building lines.

All Accu-Fit railing systems are constructed from 1 1/4" hot-dipped galvanized schedule 40 pipe. Perhaps the best part is that the Accu-Fit railing system is completely free-standing. Our weighted base system provides the necessary counter-balance required to meet and exceed the OSHA load rating these systems must comply with.

- Straight Stanchions
- OSHA Compliant
- No Roof Penetrations
- Galvanized Finish Standard
- Custom Colors Available
- Up to 10' Stanchion Spacing

Rubber pads on the base plates act as a barrier between the base and sensitive roof surfaces.

ACCU-FIT ARCHITECTURAL SERIES

The Accu-Fit Architectural Series railing system features curved stanchions that present a swept-back profile enhancing the appearance of the roof line making it look like an integrated aspect of the building.

The Architectural Series is available in a galvanized finish that blends in with most facades. Optional powder coat colors can also be added as a topcoat where blending in with the building coping or edge metal for a completely custom appearance is desired.

- Curved Stanchions
- OSHA Compliant
- No Roof Penetrations
- Galvanized Finish Standard
- Custom Colors Available
- Up to 10' Stanchion Spacing

Architectural Series railings offer reduced visibility from street level while maintaining a high degree of safety and compliance on the roof.

ACCU-FIT DESIGNER SERIES

For a completely customized look that will turn heads we recommend the Accu-Fit Designer Series railing system. This sophisticated, rather edgy railing system features curved stanchions that change in appearance from every angle.

The Designer Series is for that discriminating customer that needs fall protection yet wants to make a statement in the process. We offer a variety of color combinations for stanchions and railings that can be combined to take unique branding to a new level. See our on-line App that lets you choose your own unique customized rail-to-stanchion color combination.

- Designer-Styled Stanchion
- OSHA Compliant
- No Roof Penetrations
- Galvanized Finish Standard
- Custom Colors Available
- Up to 10' Stanchion Spacing

Corner pipes can be easily trimmed in the field to get around obstructions thereby delivering a clean, finished appearance.

ACCU-FIT

The versatility of the Accu-Fit Fall Protection Railing System is self-evident. It is the next chapter of the constantly evolving fall protection industry. But the versatility of Accu-Fit doesn't stop here. The Accu-Fit Traditional and Architectural Series railing systems can also be used on metal deck roofs once thought impossible to protect. Roofs like standing seam, R-panel and corrugated roofs now can be protected with the security of the Accu-Fit Fall Protection Railing System.

ACCU-FIT RAILINGS ON STANDING SEAM ROOFS

This clamp-on, non-piercing railing system features mounting plates that attach to the vertical seam of the roof panel and fit a variety of standing seam widths and profiles. Mounting plates and railings come in standard galvanized finish and are also available in a wide range of RAL powder coat colors. Your choice of Traditional or Architectural stanchions.

ACCU-FIT RAILINGS ON R-PANEL ROOFS

R-panel roofs are exposed fastener roofs. Our Accu-Fit railing systems feature screw-down attachment with gasketed self-sealing hardware that attaches to the sides of the ridge profile of the roof panel. Mounting plates and railings come in standard galvanized finish and are also available in a wide range of RAL powder coat colors. Your choice of Traditional or Architectural stanchions.

ACCU-FIT RAILINGS ON CORRUGATED ROOFS

Corrugated roofs are exposed fastener roofs. Our Accu-Fit railing systems feature screw-down attachment with gasketed self-sealing hardware that attaches to the valley of the corrugated ridges. Mounting plates and railings come in standard galvanized finish and are also available in a wide range of RAL powder coat colors. Your choice of Traditional or Architectural stanchions.
