Bicycle Security Solutions

By Graber Manufacturing, Inc.
Welcome to Madrax

Working Together as a Family for 30 Years to Create Innovative Solutions for Bicycle Security

At Madrax, we are passionate about our bike racks. Since 1989, Madrax has been a premier manufacturer of heavy-duty, high-quality bicycle parking racks that are innovative, practical, and aesthetically pleasing. Our standards are rigorous, and each of our bicycle racks undergoes stringent quality testing before we put our name on one. It’s the way we’ve done it for 30 years, and it’s why Madrax is increasingly the bicycle rack of choice worldwide. As an added bonus, our wide selection of colors and styles combine both form and function to give you the greatest variety of racks from which to select. At Madrax, we are committed to our status as a family owned and operated company and respect all our customers and employees through honesty and openness in our business practices. We take pride in our quality and our craftsmanship and strive to create products that are as fun for our customers to see and use as they are for us to make!
Bike Parking Guide

Overview

Biking is increasingly becoming the number one choice for alternative transportation and it is important to provide secure bicycle parking. By providing bicycle parking, you will be encouraging a healthy community and environment. Cyclists’ bikes are precious and we get that! So we created some easy guidelines to help you design bicycle parking that is secure and functional.

Site Planning

The first thing in planning for bicycle parking is to figure out whether you need short-term parking or long-term parking.

Short term parking provides convenient and secure parking for a couple of hours or less. Location of short-term parking should be near the main entrance of the building in a well-lit area. Bicycle racks should be 50 ft. from the entrance or closer than the nearest car parking stall. Short-term bicycle parking should be obviously visible from the entrance.

Long-term parking is best for commuters who must leave their bicycles for more than two hours. This is the most secure type of bike parking since bikes are protected from theft and weather conditions. Bike lockers are the most common and cost effective choice for long-term parking. Because long-term parking is usually located in low traffic areas, effective signage is recommended.

Choosing a Bicycle Rack

Not all bicycle racks are created equal. When selecting a bicycle rack, determine the appropriate user and where the bicycle racks will be installed. Ease of use, support of the bicycle, security, capacity, function, quality of materials and aesthetics are all considerations when purchasing bicycle racks.

When choosing a bicycle rack, make sure the rack is made out of high quality material. Choose a bike rack that supports the bicycle upright by its frame at two points; this prevents the front wheel from turning and the bicycle from tipping over. Make sure the frame and one or both wheels can be secured using a U-lock. For additional bicycle support use bicycle racks that have wheel wells.

Install Options

Racks must be securely anchored to the ground to prevent bike thieves from freeing the rack. There are four installation types: in ground mount, surface mount, freestanding/rail mount and freestanding.

In ground: This is a permanent option where the bottom of the rack is encased in a concrete bed. This option is often used when installing on asphalt, grass or pavers.

Surface mount: This is the most common option that has a flange plate with mounting holes to be anchored to an existing concrete pad. This option is often used when installing on asphalt, grass or pavers.

Freestanding: This is the most common option that has a flange plate with mounting holes to be anchored to an existing concrete pad. This option is not secure on asphalt or pavers.
**Spacing Recommendations**

**CHECK YOUR LOCAL CODES.**

**Bike Racks**

- **36” min** 48” Recommended Spacing Between Racks
- **120” Between Racks** (Allows for 48” Aisle from Tire to Tire)
- **96” From Building**
- **72” (48” Min) Between Racks**
- **24” From Street**

**Bike Lockers**

- **84” Between Lockers Recommended**
- **82” For Double Side Installation** (Allows for 48” Aisle from Tire to Wall)
- **36” for Single Side Installation** (Allows for Tire Spacing)
- **8’ Wall, Horizontal, and Vertical Units are Spaced 15” on Center and Staggered 8” Vertically.**

**Sidewalk Placement**

There must be at least a six-foot clear walkway from the building, to comply with the Americans with Disabilities Act. The bicycle rack cannot be located directly in front of a store/building entrance or exit, nor in a driveway. The bicycle rack cannot be located closer than two feet from the curb. Three feet from the curb is ideal, although in certain circumstances, the distance may be greater.

If you have questions about whether a particular bicycle parking rack you are considering using meets any of these requirements, please contact Madrax customer service and consult your local regulations.

**Check Your Local Codes.**

**96” From Building  72” (48” Min) Between Racks**

**48” Aisle Recommended.**
imagine. inspire. create.

Custom Racks
Whether you are seeking to transform your environment, promote your organization, or just express your creativity, our custom bicycle racks are your best resource. We will work with your idea, your sketch, or your blueprint to bring your vision to life.

Custom bicycle racks can be color or design. We can match your corporate color or logo, create bicycle racks that meet your unique needs, and design and produce custom bicycle racks that are not only functional, but just plain fun.

Contact us today about your custom bicycle rack needs. Let’s work together to take your ideas from concept to creation.

Brand Your Organization
Looking for a unique way to brand your organization, encourage cycling and support sustainability? Let Madrax help you deliver a clear message with our branding racks. Select a compatible rack, send us your logo, and in return our highly experienced engineers will send you a 3D-Rendering along with a quote... It’s that simple!

Our products are individually shaped, formed and constructed, and personally inspected to meet your specifications. We’ll always exceed your standards for quality, materials and craftsmanship.
Bike Lockers

MadLocker™

- 39" Wide x 75" Long x 46" High
- Each Unit Parks 1-2 Bikes
- Maximum Security and Tamper-Resistant
- Weather Protection, Long-Term Parking, Stackable, 100% Galvanized for Corrosion Protection, and Easy to Assemble
- 3 Point Locking Mechanism, Wider Door Opening, Non-Scratch Door Frame, and Optional Floors

Pie MadLocker™

- 39" Wide x 74" Long x 46" High
- Each Unit Parks 1 Bike
- Maximum Security and Tamper-Resistant
- Weather Protection, Long-Term Parking, Stackable, 100% Galvanized for Corrosion Protection, and Easy to Assemble
- 3 Point Locking Mechanism, Wider Door Opening, Non-Scratch Door Frame, and Optional Floors
Vertical Mad Locker™

- 31" Wide x 79" Tall x 47" Deep
- Unit Parks 1 Bike Vertically
- Maximum Security and Tamper-Resistant
- Long-Term Parking, 100% Galvanized for Corrosion Protection, and Rigid Welded Door Frame
- Bike Rack Included
- Space Saver

Narrow Mad Locker™

- 31" Wide x 75" Long x 46" High
- Unit Parks 1 Bike
- Maximum Security and Tamper-Resistant
- Long-Term Parking, Stackable, Hot Dip Galvanized Welded Steel Door Frame, Easy to Assemble, and 3 Point Locking Mechanism
- Narrow for Space Saving, Non-Scratch Door Frame, and Optional Floors

MLVF-1-P

- Two Points of Contact and Aesthetically Pleasing

Sentry™

- 33" High, Constructed of 1-1/2" Square Steel Tubing, 2" 'C' Channel and 1/2" Diameter Steel Rod
- Parks 1-9 Bikes
- Galvanized or Powder Coated
- In-Ground, Surface Mount, or Channel Mount
- Front Wheel Stops for Positive Parking and 3/4" Solid Rod for U-Locks
- 30" Spacing between Bikes, Tamper-Resistant Construction, and Ease of Installation
Shark Up™

- 35-3/4" High, Constructed of 2 x 3" Angle, 2" C Channel, and 3/4" Solid Rod for Locking
- Parks 1-9 Bikes
- Galvanized or Powder Coated
- Economical, Practical, Compact, Wheel Stops for Positive Parking, and Bike Friendly Vinyl Cushion Coating Option

'U' Racks

- 34" High and Constructed with 1-7/8" and 2-3/8" OD Steel Tubing
- Parks 2 Bikes
- Galvanized, Powder Coated, or Stainless Steel
- In-Ground or Surface Mount
- Two Points of Contact, Economical, and Secure

Shark™

- 29-1/2" High, Constructed of 2 x 3" Angle, 2" C Channel, and 3/4" Solid Rod for Locking
- Parks 1-11 Bikes
- Galvanized or Powder Coated
- Economical, Practical, Compact, Wheel Stops for Positive Parking, and Bike Friendly Vinyl Cushion Coating Option

U.S Patent No. 9,145,180
Square ‘U’ Racks

- 34" High and Constructed with 2" Square Steel Tubing
- Parks 2 Bikes
- Galvanized, Powder Coated, or Electro Polish Stainless Steel
- In-Ground or Surface Mount
- Two Points of Contact, Economical, and Secure

‘U’ Two™ Racks

- 34" High, Constructed of 1-5/8" OD Steel Tubing and 2" 'C' Channel
- Parks 1-10 Bikes
- 30" Spacing
- Galvanized or Powder Coated
- In-Ground, Surface Mount, or Channel Mount
- Two Points of Contact, Economical, and Secure

‘U’ Racks on Rails

- 34" High, Constructed of 1-7/8" OD, 2-3/8" OD Steel Tubing, and 3" 'C' Channel
- Parks 1-10 Bikes
- 30" Spacing
- Galvanized, Powder Coated, Stainless Steel, or Electro Polish Stainless Steel
- Two Points of Contact, Economical, and Secure

Square ‘U’ Racks on Rails

- 34" High, Constructed of 2" Square Steel Tubing and 3" 'C' Channel
- Parks 1-10 Bikes
- 30" Spacing
- Galvanized, Powder Coated, or Electro Polish Stainless Steel
- Two Points of Contact, Square Tubing Acts as a Deterrent to Pipe Cutters
**Bike Bollards**

- 36" High and, either 4-1/2" OD or 8" OD Tubing
- Parks up to 2 Bikes
- Galvanized, Powder Coated, Stainless Steel, or Electro Polish Stainless
- In-Ground, Surface Mount, or Removable
- Two Points of Contact, Bike Security, and/or Traffic Barriers
- Bike Parking Arms Optional

**Bollard Covers**

- Bollard Sleeve
- Bollards Locked in Place when Installed
- Cover Protects Opening when Bollard is Removed
- Hot Dip Galvanized
- Only Available in 4.5" OD Tubing

**Meter Rack**

- 3/8" Steel Plate
- Parks up to 2 Bikes
- Galvanized or Powder Coated
- Two Points of Contact and Creative Way of Utilizing Existing Meters or Posts
- Mounting Brackets for 2-3/8" or 1-5/8" Post

**Post and Ring Racks**

- 2-3/8" OD Steel Tubing and 1-5/8" OD Steel Tubing
- Parks 2 Bikes
- Galvanized, Powder Coated, or Electro Polish Stainless
- In-Ground or Surface Mount
- Two Points of Contact
Heavy Duty Challenger™

- 36" High and 2-3/8" OD Steel Tubing
- Parks 3-21 Bikes
- Galvanized, Powder Coated, or Stainless Steel
- In-Ground or Surface Mount
- Suited for Maximum Durability

Winder-Plus™

- 36" High, Constructed of 1-5/8" OD Steel Tubing
- Parks 3-11 Bikes
- Galvanized, Powder Coated, or Stainless Steel
- In-Ground or Surface Mount
- Sleek and Modern

Heavy Duty Winder™

- Height of 42" for Ease of Parking from both Sides
- 2-3/8" OD Steel Tubing
- Parks 3-21 Bikes
- Galvanized, Powder Coated, or Stainless Steel
- In-Ground or Surface Mount

Challenger-Plus™

- 36" High and 2-3/8" OD Steel Tubing
- Parks 3-13 Bikes
- Galvanized, Powder Coated, or Stainless Steel
- In-Ground or Surface Mount
- 19-1/2" Wide Loops for Ease of Parking
Capitol Square™

- 36" High, Constructed of 2" Square Steel Tubing
- Parks 3-13
- Galvanized, Powder Coated, or Stainless
- In-Ground or Surface Mount
- Square Tubing to Prevent Cutting
- 18-1/4" Wide Loops

Grand Stand™

- 29" High, Constructed of 1-1/4" OD and 3/4" OD Steel Tubing
- Parks 3-6 Bikes
- Galvanized or Powder Coated
- Freestanding
- Economical, Perfect for Homeowner, Small Retailer, or Small Office Complex

Gridrac™

- 31" High, Constructed 1-5/8" OD and 3/4" OD Steel Tubing
- Parks 4-18 bikes
- Galvanized or Powder Coated
- Freestanding
- Economical, Traditional Design, and Ease of Use

Skateboard Rack

- Constructed with 4" OD Axle Locking Tube, and 2" Square Tubing
- Parks 4 to 8 Skateboards
- Galvanized or Powder Coated
- In-Ground, Surface Mount, or Wall Mount
- Lock with any Padlock
- Fully Assembled Base Unit, Tamper-Welded Construction, Ease of Installation, and Longboard Compatible

Axle Locking Enclosure

Finishes

Galvanized
Withstanding the elements with little to no maintenance, our galvanized products are durable and weather to a battleship grey. For this finish, the product will have vent holes that will allow draining after a hot-dip in the molten zinc tank. A galvanized product is an economical choice that resists rust. This finish comes with a 5-year warranty.

Black Vinyl Cushion Coating
For the devoted bicyclist, Black Vinyl Cushion Coating is an easy way to protect the integrity of bicycles. Racks are dipped in plastisol to achieve a 1/8th inch rubbery finish. This added cushion protects high-quality bicycles from dents and scratches. The default color for this finish is black. Other colors are available upon request. Cushion Coated products have a 1-year warranty.

Stainless Steel
Crafted from stainless steel and polished to a rich, Satin #4 finish, these racks are a highly durable and attractive option that will last through decades of use. As one of our more resilient finishes, Stainless Steel is perfect for products used in salty ocean air and other tough environmental conditions. Products come with a 5-year warranty.

Electro Polished Stainless Steel
Much like our Stainless Steel finish, Electro Polished Stainless lends decades of durability to your rack. To achieve this sleek and polished look, our Electro Polished Stainless Steel finished racks are dipped into an electro-chemical bath that removes mill scale impurities and adds a high level of shine. This product is complete with a 5-year warranty.

Thermoplastic Powder Coat
Protect bicycles from dents and scratches with this lightly cushioned thermoplastic finish. Rack is powder coated after fabrication with thermoplastic polyethylene coating, giving the product a slightly soft and protective quality. Thermoplastic Powder Coated products are backed by a 1-year warranty. Limited color selection available.

Powder Coated Stainless Steel
Constructed with stainless steel, Powder Coated Stainless Steel racks are highly durable due to the anti-corrosive property of the steel used in construction. Racks are polished and then coated with an electrostatically applied super TGIC polyester powder. These products come with a 5-year warranty due to the durable steel they are constructed with.

Super TGIC Powder Coat
Available in 16 vibrant shades, Super TGIC coated products will stain significantly less from UV light than other finishes, keeping your rack’s color vivid longer. Rack is powder coated after fabrication with a 5-6mm thick electrostatically applied super polyester powder coating. This finish has a 1-year warranty.

Note: Due to variations in the printing process, colors shown may not be an exact match. Please request color samples from Madrax for accurate color comparisons.

Looking for Site Furnishings?

Look to Thomas Steele to Enhance Your Outdoor Space

Creative craftsmanship.
For more than a decade, our craftsmen have been creating site furnishings that stand out for their stylish designs, broad palette of colors, and exceptional handcrafted quality.

Designs and finishes made to order.
You have more design options, with choices ranging from steel strap, perforated metal and steel rod to wood. Choose one family, or mix and match to create an environment that meets your unique needs.

Thomas Steele stands out for its finishes, a selection of incomparable beauty and variety. Select any item from the eight Thomas Steele design families, choose a finish, and we’ll build it for you – custom craftsmanship every time. So explore our catalog. Expand your mind. Select the Thomas Steele furnishings that will fit your site just so.

e-Steele™ … When FORM is not enough.
No matter how hard the use or how harsh the environment, this premier finish really stands up against pitting, staining and rusting.

Thomas Steele improves on the industry standard polyester powder finish by applying a “state-of-the-art” 18-step finishing process that includes sandblasting, zinc corrosion protecting, epoxy primer and TGIC Super-Durable Polyester powder coat. This is the superior process that is also earth friendly. Our unique e-Steele™ technology produces the most durable finish.

The result? Gleaming good looks and rugged durability, backed by an unsurpassed 5-year warranty.

TERMS AND CONDITIONS

All orders must be in writing and are subject to acceptance by Graber Manufacturing, Inc. No verbal orders will be accepted. All prices are FOB Graber Manufacturing’s factory and are in U.S. dollars. Prices are subject to change without notice. Shipments will be made at prices prevailing at the time of the shipment.

Net is due 30 days from date of invoice when buyer is a tax-supported government entity or a company with approved credit. Buyers without approved credit must submit full payment with order. Service charge is 1-1/2% per month on all invoices after 30 days. Graber Manufacturing, Inc. also honors American Express, MasterCard and VISA. (Credit card fees of 3% maybe assessed if used at other times) Graber Manufacturing, Inc. reserves the right to change terms if necessary.

Graber Manufacturing, Inc. reserves the right to discontinue or change the design and specification of units, and to ship the revised product without notice when such changes have been made.

LIMITED WARRANTIES

Madrax division of Graber Manufacturing. (“Madrax”) warrants products it manufactures against defects in materials or workmanship for a period of one year from the date of invoice.

Hot dipped galvanized and stainless steel products are warranted against corrosion for a period of five years from the date of invoice. All Madrax products (excluding bicycle lockers and Phil Up tire pump) are warranted against structural failure for a period of twenty years from the date of invoice. Bicycle lockers are warranted against structural failure for a period of one year from the date of invoice.

Superficial wear or damage such as scratches, nicks or dents caused by normal wear and tear are not covered by this warranty. These warranties do not cover any defects or failure due to vandalism, negligence, abuse, accidents, lack of maintenance or improper installation. Unless previously approved in writing by Graber Manufacturing, Inc. this warranty does not cover any defects or failure due to products tampered with or altered, modified or repaired by anyone.

For additional specific conditions and limitations, contact your local Madrax representative or Graber Manufacturing, Inc.
